

Connect the DOTS

start here

TB is
**totally
curable**
but socially
misunderstood

In one particular
day, 2 people were
reported to have
died of SARS, while

75
people died of TB

Our
strategy:

DOTS --
Directly Observed
Treatment Short
Course

Enhance
private sector
participation for stronger
partnership with government
to reduce TB

A TB-free
Philippines!

Office of Population, Health and Nutrition
